Adopting a practical approach, the authors provide a detailed interpretation of the existing regulations (GMP, ICH), while also discussing the appropriate calculations, parameters and tests. The book thus allows readers to validate the analysis of pharmaceutical compounds while complying with both the regulations as well as the industry demands for robustness and cost effectiveness. Following an introduction to the basic parameters and tests in pharmaceutical validation, including specificity, linearity, range, precision, accuracy, detection and quantitation limits, the text focuses on a life-cycle approach to validation and the integration of validation into the whole analytical quality assurance system. The whole is rounded off with a look at future trends. With its first-hand knowledge of the industry as well as regulating bodies, this is an invaluable reference for analytical chemists, the pharmaceutical industry, pharmacologists, QA officers, and public authorities.

Het verhaal van Lucy Gault begint in 1921 op het roerige Ierse platteland. De vader van de negenjarige Lucy betrapt drie nationalisten op zijn landgoed Lahardane, hij schiet en verwondt één van hen. Dat zal hem door de lokale bevolking niet vergeven worden. Hoewel de Gaults er al vele generaties wonen, besluiten zij het voorbeeld van andere grootgrondbezitters te volgen en hun landgoed te verlaten. Lucy kan dit vooruitzicht niet verdragen: het oude huis, de kust en

de boerderijen zijn haar wereld. Ze besluit dat het vertrek niet zal plaatsvinden. Maar het noodlot slaat toe en een gigantische ramp vindt plaats; een straf zo wreed dat de levens van vele toekomstige generaties van de familie Gault erdoor worden verwoest.
