Now more than ever, a company's success -- indeed its survival -- depends on a firmwide effort to create the best products and bring them to market quicker than competitors. Going beyond the traditional focus on design and production exclusively, product development expert Philip H. Francis provides senior managers with the methods and tools to orchestrate the entire enterprise for creating a legacy of product excellence. For the first time, Francis presents a holistic view of product creation--not just the core elements of engineering and industrial design, but also design's interface with manufacturing, the customer's voice and quality commitments, and the essential functions of technology management and leadership. From his unique vantage point as a former professor and researcher as well as a chief technology officer and director of advanced manufacturing technology, Francis presents the nine key business functions of new product development (NPD): manufacturing strategy, IT systems, issues of leadership and culture, customer satisfaction, quality, operations and measurement, intellectual property, the management of research and development, and technology. In immensely readable prose, Francis devotes a chapter to each function, explaining how managers can implement and manage each of these nine NPD functions. Francis enriches his arguments with real-world examples of triumphs and failures in a variety of industries, from consumer products such as furniture to business products such as networking software. He offers hands-on suggestions and strategies for every stage in the product development process, including "Ideas for Action" sections containing killer questions that can eliminate a product at any stage. Special sections of the book elaborate on the steps to take during key NPD processes. Written for those trained in technology as well as business-oriented industrial managers, Product Creation will be timely and necessary reading for CEOs, engineers, designers, marketing managers, IT officers, as well as anyone concerned with product development from conception to market.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Manufacturers are increasingly, under pressure from their major stakeholders to integrate environmental issues in the design and management of their products. These stakeholders include customer, regulators, employees, communities, and interest groups who have a common stake in protecting the earth from pollution and in limiting the exploitation of earth's limited natural resources. Manufacturers recognize that being environmentally responsible also offers competitive advantage to the firm. Hence the Handbook of Environmentally Conscious Manufacturing is written as a state-of-the-art reference to environmentally conscious manufacturing (ECM). The chapter authors were carefully selected. All the chapter authors have done extensive research and / or practice work in the field of ECM. The Handbook covers all the major topics in Environmentally Conscious Manufacturing. There are specific chapters to deal with sustainable manufacturing, recycling, eco-labelling, life cycle assessment, and ISO 14000 series of standards, as well as decision-making aspects of Environmentally Conscious Manufacturing. Decision-oriented topics on supply chain, decision models, quality initiative, environmental costing and decision support systems are also covered. The influence of ECM on marketing imperative is also covered. The Handbook is the most comprehensive treatment of Environmentally Conscious Manufacturing available to-date. It is the definitive, state-of-the-art reference to ECM and its applications to today's manufacturing firms.

Alle ogen zijn gevestigd op het Midden-Oosten. Israël heeft een eerste aanval op Iran uitgevoerd en daarbij alle nucleaire bases uitgeschakeld plus zes nucleaire kernkoppen onschadelijk gemaakt. De Twaalfde Imam kondigt nietsontziende wraakacties aan. De president van de VS, William Jackson, dreigt een motie van de VN Vredesraad te steunen die de Joodse Staat scherp veroordeelt voor daden van niet-uitgelokte en ongerechtvaardigde agressie. Intussen heeft CIA-agent David Shirazi als infiltrant in het Iraanse regime informatie onderschept waaruit blijkt dat twee Iraanse kernkoppen onbeschadigd zijn gebleven en zijn veiliggesteld op een geheime locatie. Terwijl het gevaar op raketinslagen toeneemt maar ook de houding van vele regeringen steeds vijandiger en achterdochtiger wordt, moeten David en zijn team in een race tegen de klok de kernkoppen zien te lokaliseren. Voordat zich een mondiale ramp zal voltrekken. Lemon-Aid Used Cars and Trucks 20102011 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years of production. This book offers an exposé gas consumption lies, a do-it-yourself service manual, an archive of service bulletins granting free repairs, and more.
