If you're considering the vastly improved 2007 version of SharePoint, this concise, practical and friendly guide will teach you how to get the most from the latest version of Microsoft's information-sharing and collaboration platform. Essential SharePoint 2007 demonstrates how your business can use SharePoint to control documents, structure workflow, and share information over the Web using standard tools business users already know -- Microsoft Office and Internet Explorer. Written in a conversational tone by internationally recognized SharePoint consultant and trainer Jeff Webb, this book helps SharePoint administrators, site owners, and power users quickly gain the skills necessary to perform a wide variety of tasks for intranet and extranet web sites, and explains what's new in SharePoint 2007 for experienced SharePoint 2003 administrators. Essential SharePoint 2007 teaches you how to: Use SharePoint 2007 with Outlook, Word and Excel, and as a document management tool, replacing, for example, shared network drives with libraries Build and customize sites, lists, libraries and web parts for intranets and extranets Use SharePoint 2007 for team communication through blogs, wikis, surveys, and RSS and email alerts Build a SharePoint workflow application Create and program web parts in order to deliver custom services and data to a site Deploy and administer SharePoint 2007 Each chapter ends with a summary of best practices advocated by the author, and the first few chapters of the book are ideal as training materials for end users. Later chapters give developers and administrators tools not only to keep company sites running smoothly, but also to customize and extend them. The book also contains several appendices with a glossary of terms and hard-to-find information.

Essential SharePoint 2007 is a one-stop task-oriented guide for learning what's necessary to make this tool a vital part of team productivity.

DEXA 2005, the 16th International Conference on Database and Expert Systems Applications, was held at the Copenhagen Business School, Copenhagen, Denmark, from August 22 to 26, 2005. The success of the DEXA series has partly been due to the way in which it has kept abreast of recent developments by spawning specialized workshops and conferences each

with its own proceedings. In 2005 the DEXA programme was co-located with the 7th International Conference on Data Warehousing and Knowledge Discovery [DaWaK 2005], the 6th International Conference on Electronic Commerce and Web Technologies [EC-Web 2005], the 4th International Conference on Electronic Government [EGOV 2005], the 2nd International Conference on Trust, Privacy, and Security in Digital Business [TrustBus 2005], the 2nd International Conference on Industrial Applications of Holonic and Multi-agent Systems [HoloMAS 2005], as well as 19 specialized workshops. These proceedings are the result of a considerable amount of hard work. Beginning with the preparation of submitted papers, the papers went through the reviewing process. This process was supported by online discussion between the reviewers to determine the final conference program. The authors of accepted papers revised their manuscripts to produce this fine collection. DEXA 2005 received 390 submissions, and from those the Program Committee selected the 92 papers in these proceedings. This year the reviewing process generated more than 1000 referee reports. The hard work of the authors, the referees and the Program Committee is gratefully acknowledged.
