Het is een van de grote wereldvraagstukken: waarom zijn sommige landen rijk en andere arm? Ligt de verklaring in culturele verschillen, het klimaat of geografische omstandigheden? Of is er een andere oorzaak? Waarom is bijvoorbeeld Botswana een van de snelst groeiende economieën ter wereld en blijven andere Afrikaanse landen, zoals Zimbabwe en Congo, ondergedompeld in geweld en armoede? Daron Acemoglu en James Robinson laten overtuigend zien dat het de politieke en economische instituties zijn die het economische succes of falen van een land bepalen; instituties die innovatie en economische groei stimuleren en welvaart en vrede garanderen. De auteurs illustreren hun betoog met tal van fascinerende voorbeelden. Eén daarvan is Korea, een in wezen homogene staat. In Zuid-Korea legt de overheid verantwoording af aan de burgers en heeft de bevolking volop economische kansen; het land is zeer welvarend. Noord-Korea wordt dictatoriaal geregeerd en kent al tientallen jaren onderdrukking en hongersnood. Op basis van vijftien jaar veldonderzoek en historische research hebben de auteurs een nieuwe, overtuigende politiek-economische theorie geformuleerd. Waarom sommige landen rijk zijn en andere arm laat ons met andere ogen naar de wereld kijken en geeft een dieper inzicht in de oorzaken van armoede en rijkdom. Daron Acemoglu is hoogleraar economie aan het MIT. Hij ontving de John Bates Clark Medal. Degenen die deze onderscheiding krijgen, worden beschouwd als belangrijke kanshebbers voor de Nobelprijs. James Robinson is politiek wetenschapper en econoom. Hij is hoogleraar aan Harvard University en een wereldberoemde Latijns-Amerikaan Afrikadeskundige. 'Acemoglu en Robinson hebben een boeiend en zeer lezenswaardig boek geschreven.' Niall Ferguson 'In Why Nations Fail staan zo veel goede dingen, dat ik onmogelijk alles kan opnoemen.' Charles C. Mann 'Acemoglu en Robinson hebben een belangrijk boek geschreven, dat het verdient te worden gelezen door politici en economen waar ook ter wereld.' Het Financieele Dagblad 'Waarschijnlijk leest u net als ik dit boek in één keer uit en neemt u het daarna nog vaak ter hand.' Jared Diamond, auteur van Zwaarden, paarden & ziektekiemen

In *The Turn of the Tortoise*, T N Ninan explores the paradox of a "premature superpower" (as Martin Wolf once described India in the Financial Times). India has grown from the 12th largest economy in 2008 to what IMF reckons is the 7th largest in 2015, even as its people are poorer than those in Laos and Sudan. Ninan assesses India's position as a natural counter-weight to China, though fundamentally different from that country and overshadowed by it in an unequal military balance and in the contest for influence in a region that stretches beyond Asia to Africa. And finally, Ninan looks at how the third-largest contributor to global economic growth remains troubled by slow economic reform and the poor standards of governance that make it a difficult place in which to do business. The author considers the social, economic and political forces that helped the rise of Prime Minister Narendra Modi, and the risks of constitutional liberalism yielding space to an illiberal democracy. He views the role of Indian business conglomerates as double-edged, and reviews India's stance and role in global trade and climate change negotiations. This work uses data extensively to support analysis, even as it tells stories of hope and frustration within a framework of qualified optimism. The brisk and engaging style of an expert wordsmith will appeal to anyone interested in the new "Asian Drama": the tension with China, the "arc of friendship" that brings closer the region's largest democracies (Japan, Australia and India), and the many facets of the new energy in Indo-US relations. If you want to make sense of a complex country that encompasses "a universe of realities," this is the book you've been waiting for.

Conditions of malnutrition, conflict, or a combination of both characterize many Arab countries, but this was not always so. As in much of the developing world, the immediate post-independence period represented an age of hope and relative prosperity. But imperialism did not sleep while these countries developed, and it soon

intervened to destroy these post-independence achievements. The two principal defeats and losses of territory to Israel in 1967 and 1973, as well as the others that followed, left in their wake more than the destruction of assets and the loss of human lives: the Arab World lost its ideology of resistance. The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world's developmental descent from the pinnacle of Arab socialism to its present desolate conditions through an examination of the post-colonial histories of Egypt, Syria, and Iraq.
