

## Crowdfunding The Next Big Thing

Post-Capitalist Entrepreneurship: Startups for the 99% details the implications of the post-capitalist society on entrepreneurship around the globe, and it challenges many of our underlying assumptions about how entrepreneurs form startups and the objectives and roles, or lack thereof, of startup investors in a post-capitalist society. The author explores real emerging stories about different forms of post-capitalist entrepreneurship (PCE) with chapters dedicated to subjects such as platform cooperatives, alternative currencies (local, crypto, and time banking), and the emergence of blockchain-enabled Distributed Autonomous Organizations (DAOs). This book will help aspiring and current entrepreneurs, investors and policymakers to: Understand emerging trends in new forms of economic activity that will shape the future of entrepreneurial opportunities Discover new approaches to business modeling in the post venture-capital opportunity space Embrace Lean startup and collaborative startup approaches that can accelerate startups in these new markets Recognize new spaces and avoid being disintermediated by new forms of startups and financing Know why and how local governments should reshape entrepreneurship policy to support post-capitalist entrepreneurship for the 99%

In *CrowdFunding: The Next Big Thing*, money-raising expert Gary Spierer reveals the secrets of raising capital in the digital age. He outlines the ins and outs of the five major capital-raising strategies, including how the current Kickstarter type crowdfunding differs from crowdfunding equity. The new world of crowdfunding equity can be hard to navigate due to numerous regulations, and the challenge of keeping crowds engaged. Crowdfunding start-ups is a platform made possible thanks to the recent JOBS Act. Now even the small guy can invest in early stage companies and potentially strike it rich with the crowdfunding platform and the investing and business-building tools provided in *CrowdFunding*. Spierer guides readers through the seven steps that any start-up business can employ to ensure success in raising money and building a business. With a great idea and design, a start-up needs to thoroughly and repeatedly research and pretest its product in the marketplace until the ideal niche is narrowed down in order to attract the most customers. Spierer points out that too many entrepreneurs believe that if you build a field of dreams they will come. He shows in detail how to drive traffic, get them to come to your field of dreams, and stay. In *CrowdFunding*, entrepreneurs will learn about successful pitches and how to pitch concepts in person or on crowdfunding websites. They will learn how and when to use one or more of the five money-raising strategies in the digital age. According to Spierer, "The perfect pitch comes from refining and distilling core ideas over and over." They will also learn about the new SEC regulations imposed to protect investors. Spierer lays out all of the exciting new platforms for marketing a product or service start-up interactively via the infinite possibilities and fluctuations of social media, mobile, and the web. He explains how to work with the savvy consumer of today, who expects to be part of the marketing conversation. Spierer's book shares the secrets that venture capitalists have employed to identify potential blockbuster investments and how the same approaches can be deployed in analyzing crowdfunding opportunities.

Crowdfunding is not only interesting for entrepreneurs who want to raise money, but also for the "crowd", people who are attracted by this phenomenon and for future investors. Being an entrepreneur is exciting and crowdfunding seems to be a fantastic option of financing a new venture. Therefore the following question occurs: Start-up + Crowdfunding = The next Big Thing? Katharina Wolfrat first gives an overview of the crowdfunding scene in Germany. Then she interviewed experts in this area and presents the results of the conversations. In the end there are many advices for entrepreneurs, who think about using crowdfunding as financing model for their start-up.

This new volume familiarizes readers with the very relevant concepts of human resources and finance in Industry 4.0. The book looks at the adoption of current fast-moving computers and automation in the workplace and its impact on the financial aspects of human resources and how HR can be enhanced with smart and autonomous systems fueled by data and machine learning. The chapters offer case studies that provide firsthand knowledge of real-life problems, solutions, and situations faced by the industry. The volume highlights the thought process in resolution of the complex problems. Topics include HR management approaches, global HR challenges, behavioral finance for financial acumen, corporate social responsibility, women empowerment in the HR industry, emotional intelligence in the era of Industry 4.0, and more. A practical guide to the challenges and successes of global fundraising, written by an international team of highly respected philanthropy professionals and edited by two of the leading nonprofit thinkers, *Global Fundraising* is the first book to genuinely offer a global overview of philanthropy with an internationalist perspective. As the world becomes more interdependent, and economies struggle, global philanthropy continues to increase. More than that, nonprofits are taking up roles that have traditionally been filled by the government—including social welfare, healthcare, and human rights. *Global Fundraising* provides complete coverage of the implications of this growth for nonprofit culture and how it drives changes in fundraising practices. Organized into thematic chapters—a mixture of geographic and topical issues—it places North American philanthropy in a wider context. It features a companion website with a variety of online tools and materials. The book includes contributions by international leading experts Matt Ide, Mair Bosworth, Usha Menon, Anup Tiwari, Paula Guillet de Monthoux, Angela Cluff, Norma Galafassi, Mike Muchilwa, Tariq Cheema, Lu Bo and Nan Fang, Masataka Uo, Chris Carnie, Sean Triner, Andrea McManus, Marcelo Inniarra, Ashley Baldwin, Rebecca Mauger, Youngwoo Choi, R.F. Shangraw, Jr., Sudeshna Mukherjee, and Anca Zaharia. The book skillfully tracks how the world of fundraising is changing rapidly due to a number of factors including: continuing growth of great wealth; non-profit innovation emerging everywhere; growth of indigenous NGOs; increased professionalism in fundraising; and the value and role of new and social technologies. Written by a team of philanthropy leaders, *Global Fundraising* offers timely coverage of fundraising around the world. A must-have for INGO leaders and anyone, anywhere, interested in the future of philanthropy and effective fundraising practices.

This book explains how investor behavior, from mental accounting to the combustible interplay of hope and fear, affects financial economics. The transformation of portfolio theory begins with the identification of anomalies. Gaps in perception and behavioral departures from rationality spur momentum, irrational exuberance, and speculative bubbles. Behavioral accounting undermines the rational premises of mathematical finance. Assets and portfolios are imbued with "affect." Positive and negative emotions warp investment decisions. Whether hedging against intertemporal changes in their ability to bear risk or climbing a psychological hierarchy of needs, investors arrange their portfolios and financial affairs according to emotions and perceptions. Risk aversion and life-cycle theories of consumption provide possible solutions to the equity premium puzzle, an iconic financial mystery. Prospect theory has questioned the cogency of the efficient capital markets hypothesis. Behavioral portfolio theory arises from a psychological account of security, potential, and aspiration.

This book provides the latest research findings, and discusses, from both theoretical and practical perspectives, innovative research methods and development techniques related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems and secure intelligent cloud systems. It also presents the synergies among various paradigms in such a multi-disciplinary field of intelligent collaborative systems. With the rapid development of the Internet, we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm, which locates people at the very centre of networks and exploits the value of individuals' connections, relations and collaboration. Social networks are also playing a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations strongly leverage intelligent networking and collaborative systems by means of a great variety of formal and informal electronic relations, such as business-to-business, peer-to-peer and various types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, the latest, powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications significantly, but are also facing new issues and challenges. The principal purpose of the research and development

community is to stimulate research that will lead to the creation of responsive environments for networking and, in the longer term, the development of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning.

What if the real key to a richer and more fulfilling career was not to create and scale a new start-up, but rather, to be able to work for yourself, determine your own hours, and become a (highly profitable) and sustainable company of one? Suppose the better—and smarter—solution is simply to remain small? This book explains how to do just that. *Company of One* is a refreshingly new approach centered on staying small and avoiding growth, for any size business. Not as a freelancer who only gets paid on a per piece basis, and not as an entrepreneurial start-up that wants to scale as soon as possible, but as a small business that is deliberately committed to staying that way. By staying small, one can have freedom to pursue more meaningful pleasures in life, and avoid the headaches that result from dealing with employees, long meetings, or worrying about expansion. *Company of One* introduces this unique business strategy and explains how to make it work for you, including how to generate cash flow on an ongoing basis. Paul Jarvis left the corporate world when he realized that working in a high-pressure, high profile world was not his idea of success. Instead, he now works for himself out of his home on a small, lush island off of Vancouver, and lives a much more rewarding and productive life. He no longer has to contend with an environment that constantly demands more productivity, more output, and more growth. In *Company of One*, Jarvis explains how you can find the right pathway to do the same, including planning how to set up your shop, determining your desired revenues, dealing with unexpected crises, keeping your key clients happy, and of course, doing all of this on your own.

Business systems undergo a number of transitions as the needs and demands of society change. With heightened connectivity driven by the development of the Internet, new opportunities for venture development and creation have become available to business owners and entrepreneurs. *Crowdfunding for Sustainable Entrepreneurship and Innovation* is a pivotal reference source for the latest scholarly research and business practices on the opportunities and benefits gained from the use of crowdfunding in modern society, discussing its socio-economic impact, in addition to its business implications. Featuring current trends and future directions for crowdfunding initiatives, this book is ideally designed for students, researchers, practitioners, entrepreneurs, and policy makers. New financing models such as crowdfunding are democratizing access to credit, offering individuals and communities the opportunity to support, co-create, contribute and invest in public and private initiatives. This book relates to innovation in its essence to anticipate future needs and in creating new business models without losing revenue. There are tremendous unexplored opportunities in crowdsourcing and crowdfunding; two sides of the same coin that can lead to a revolution of current social and economic models. The reading of this book will provide insight on the changes taking place in crowdfunding, and offer strategic opportunities and advantages.

This book presents the latest innovative research findings, methods, and development techniques related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems, and secure intelligent cloud systems. Offering both theoretical and practical perspectives, it also reveals synergies among various paradigms in the multi-disciplinary field of intelligent collaborative systems. With the rapid development of the Internet, we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm that places people at the very centre of networks, making full use of their connections, relations, and collaboration. Social networks also play a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, communities and organizations strongly leverage intelligent networking and collaborative systems through a wide variety of formal and informal electronic relations, such as business-to-business, peer-to-peer, and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and autonomously. In addition, while the latest powerful technologies based on grid and wireless infrastructures as well as cloud computing are currently greatly enhancing collaborative and networking applications, they are also facing new challenges. The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and, in the long term, the development of adaptive, secure, mobile, and intuitive intelligent systems for collaborative work and learning.

Crowdfunding - The Next Big Thing? How Crowdfunding Is Evaluated by Different Expert Groups as a Future Model of Financing New Ventures in Germany Createspace Independent Pub

Block chain, mostly known as the backbone technology behind Bitcoin, is one of the hottest and most intriguing technologies currently in the market, but what exactly is it - and can it somehow help you? Simply put, Block Chain is the digital equivalent of a banker's ledger, one that records and secures transactions between two parties. Set to cyberspace, this type of programming allows the transfer not only of data, but of value - making it a unique and fundamental building block of our emerging future. Block chain technology was originally developed in 2009 to enable individuals and organizations to process transactions without the need for a central bank or other intermediary, using complex algorithms and consensus to verify transactions. Now it has been adopted and modified by companies and start-ups the world over, and is being closely scrutinized by World Banks as the logical next step in digital finance. This book explains Block Chain in its entirety; its history, uses, potential, disadvantages and even its future. Understanding this valuable, open system is vital to creating the financial freedom you crave. Digital currency is no longer a pipe dream of the basement gamer, its real, it's here, and you need to comprehend how it moves and is secured in order to plan for a future that will see a revolution in our current banking system.

Let's talk about what we all just went through. I am talking about the dramatic ways in which 2020, and all that happened have changed the way we look at life. Most entrepreneurs I know have expressed the need they feel to innovate to help mankind deal with the challenges and opportunities ahead. In this book, I tackle some of these topics. I delve into the world of Equity Crowdfunding, innovation, positioning one's startup to thrive in the era of COVID, and so much more.

*Bold* is a radical how-to guide for using exponential technologies, moonshot thinking, and crowd-powered tools to create extraordinary wealth while also positively impacting the lives of billions. A follow-up to the authors' *Abundance* (2012).

*Real Estate Crowdfunding: An Insider's Guide to Investing Online* introduces the reader to basic real estate investment concepts and then takes a deep dive into how to invest passively yet wisely in real estate syndications. This book will teach the reader how to: • invest in crowd-funded real estate syndicates • understand key financial concepts used in the industry • diversify their investment portfolios • read between the lines of investment contracts • maximize profit while minimizing losses This book is a guide to the foundational financial concepts upon which all real estate projects are based and explains the language of real estate from an insider's perspective. It provides a road map of what to watch for and how to win at the game of passive real estate investing.

China is currently the front-runner on the global crowdfunding market, even though this form of financing originated in the USA. Crowdfunding in China, however, differs significantly from its counterpart in the West. This book reveals that Chinese crowdfunding is a product of the country's dynamic internet sector, which is based on mobile internet, e-commerce, and online/mobile payments, together with significant government support. The author presents a comprehensive theoretical, empirical and field-based work on crowdfunding in China. Adopting a new institutional economics approach, it maps and deciphers the origins and paths of informal finance that have led to internet finance and the rise of crowdfunding platforms. In addition, three case studies are analyzed and their implications for crowdfunding stakeholders in China are discussed.

Learn Effective Bitcoin Strategies today to start reaching your investing and money-making goals! Learn everything there is to know about Bitcoins and the insider strategies to help you make money! Do you want to learn more about Bitcoins and its tested strategies investing with Bitcoin, but aren't sure where to start? If someone asked you to think of a successful business, you might think about companies like Amazon, Google, Apple, and Starbucks. But using these companies as a vision of success can be a bit overwhelming. I mean, how can you build a business that successful? Well, it's time to change your definition of success. Companies like Amazon and Google are big. But with big companies comes big problems, you need more profit, more employees, more infrastructure, and more bureaucracies. Is building something that big worth the stress? Instead, this "bigger is better" mentality is wrong. Success means building something small, where you work a limited number of hours per year, and enjoy spending quality time with your family, traveling, or even pursuing the hobbies you love. So rather than building a company that requires more, you should focus on building one that requires less: a company of one. As you read, you'll learn why staying small should be your end goal, how to find purpose in your work, and how to start your business without needing large investments or investors.

This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy, and in doing so builds on, rejuvenates, and refines existing organization theories.

I have a big passion for cryptocurrencies as it is the next big thing, which will change the way we interact in daily basis for example the way we buy our morning coffee or how we place an order in Amazon. The good part is that we are early in the crypto revolution. The bad part is that we are also early in the crypto revolution. Despite the fact that Bitcoin reached historical highs the last few weeks (above \$ 8,000), that is only the beginning as less than 1% of the global population holds any type of cryptocurrency. The popularity of Bitcoin coming from the rise of a new technology, which is called Blockchain. Blockchain will change the way we conduct financial transactions and it will create opportunities for early investors. Of course in every new technology, they are a few people who want to take advantage of the uneducated investors and promise them that they will be rich fast. The purpose of this book is to highlight that scams are everywhere and it is our job to evaluate them, before we place our funds in a specific cryptocurrency with the form of ICO - Initial Coin Offering. I will present the criteria for evaluation of an ICO, where to find them and where to store them if you decide that

they worth your money.

This book examines the concepts of open innovation, crowdsourcing and co-creation from a holistic point of view and analyzes them considering their suitability to the tourism industry. Methods, theories and models are discussed and examined regarding their practical applicability in tourism. The book illustrates the theoretical mechanisms and principles of Open Innovation, Crowdsourcing and Co-creation with case studies and best practices examples. In addition to the scientific target group, the book is a useful resource for managers of the entire tourism industry. First, the book presents the theoretical fundamentals and concepts in 11 specific chapters. This basis is then enriched by three parts with case studies, focusing on information, creation and provision respectively. Finally in a concluding part the editors sum up the book and give an outlook on the implications, learnings and future perspectives of open innovation, crowdsourcing and collaborative consumption in the tourism industry.

Nadine Scholz shows that crowdfunding potentially shortens the development cycle of new products, thus enabling an earlier market entry. Hence, crowdfunding serves as a multifaceted early-stage support instrument for innovation implementation facilitated by the crowd's resources. It not only provides upfront cash for product development and production, more importantly it enables a firm to show traction through the validation of the market demand that is based on the crowd's function as information multiplier generating public exposure and feedback.

The book focuses on smart computing for crowdfunding usage, looking at the crowdfunding landscape, e.g., reward-, donation-, equity-, P2P-based and the crowdfunding ecosystem, e.g., regulator, asker, backer, investor, and operator. The increased complexity of fund raising scenario, driven by the broad economic environment as well as the need for using alternative funding sources, has sparked research in smart computing techniques. Covering a wide range of detailed topics, the authors of this book offer an outstanding overview of the current state of the art; providing deep insights into smart computing methods, tools, and their applications in crowdfunding; exploring the importance of smart analysis, prediction, and decision-making within the fintech industry. This book is intended to be an authoritative and valuable resource for professional practitioners and researchers alike, as well as finance engineering, and computer science students who are interested in crowdfunding and other emerging fintech topics.

The best market in the world, for equity crowdfunding, is the UK. This is a useful review of the top 23 equity crowdfunding platforms in UK in 2017. It will help you to scan all the possibilities, save time, and quickly decide which is the best platform to raise funds for your project. While crowdfunding is still in its infancy, there are several factors that could make it the next big thing in the market. If one really thinks about it, the concept of crowdfunding has already been used for decades worldwide. Generally, the concept of crowdfunding has been used in infrastructure, relief after natural disasters and scientific research among many others. Now with the great buzz about it lately, many individuals who are not traditionally business-oriented are becoming interested in getting involved in crowdfunding real estate. Inasmuch as they have found, they get to have a share in real estate such as retail, and corporate buildings. The idea of crowdfunding has been used to fund real estate. Part of the risk in crowdfunding has to do with meeting investment?

Der CROWDFUND Act fungiert als Rechtsrahmen für das Investment Crowdfunding in den USA. Die Dissertation geht der Frage nach, ob die inhaltliche Ausgestaltung der Regelungen mit den gesetzgeberischen Zielen übereinstimmt. Der Fokus liegt auf der rechtlichen Bewertung und Analyse der Sinnhaftig- und Zweckmäßigkeit der Vorschriften, insbesondere mit Blick auf die intendierte Balance einer effektiven Kapitalmarktregulierung im Spannungsfeld von Anlegerschutz und Kapitalzugang. Ferner werden umfassend die Fragen beantwortet, ob, auf welche Art und Weise und in welchem Umfang die Vorschriften zu einer ausgewogenen Sicherstellung des Anlegerschutzes sowie zu einer Erleichterung des Kapitalzugangs beitragen werden. Die in dem Werk differenzierende Erarbeitung zweckorientierter Lösungsansätze sowie gezielte Änderungsvorschläge de lege ferenda können als möglicher Stimulus und erster Anknüpfungspunkt für eine effektivere Regulierung des Investment Crowdfunding in den USA verstanden werden.

Start strong with essential early-stage guidance from the VC perspective Startup Opportunities is the go-to guide for anyone with a great business idea. Whether it's your first business or your fifth, realistic assessment from the outset can save you a lot of time and money; why pour your heart and soul into a venture that is doomed to fail? Instead, position yourself to win from the very beginning. In this book, accomplished venture capitalists share their insight on startups and entrepreneurs: who will fail, who will succeed and why, and what you should do to give your business the very best shot at becoming a global success story. You'll learn how to evaluate your business with a critical eye, and how early customer development can be key in turning a good idea into a great opportunity. If you're serious about building a business that lasts, this book provides invaluable guidance that you really cannot miss. More than five million people will launch a business this year, and many of them will be great ideas—yet few will be around in five years, and even fewer in ten years. A great idea is not enough to build a successful business. You need to fortify your idea with the proper foundation, and a scaffolding of good planning and early action. This book shows you how. Assess your business's viability using the 10x Rule Learn when you can quit your day job—or not Take the key steps to making your business succeed Discover the opportunities worth selling everything for This expert author team has witnessed more than 30,000 pitches over two decades, and have participated in over 500 startup launches. Startup Opportunities gives you the benefit of their experience to help you start strong and stay strong.

Do you know where your money is? More importantly, do you know what your money is doing? Most of us feel confident that we know what money is. But few of us feel confident in taking responsibility for what our money does. We hand over the power of money to banks and mainstream finance with real, often damaging, consequences for people and planet. A unique collaboration between an academic and a practitioner, this book tells the story of money, from ancient Athens to the Bitcoin revolution, to explain how crowdfunding is the way for people to reclaim the power of their money in pursuit of a fairer and greener society.

What if the real key to a richer and more fulfilling career was not to create and scale a new start-up, but rather, to be able to work for yourself, determine your own hours, and become a (highly profitable) and sustainable company of one? Suppose the better--and smarter--solution is simply to remain small? This book explains how to do just that. Company of One is a refreshingly new approach centered on staying small and avoiding growth, for any size business. Not as a freelancer who only gets paid on a per piece basis, and not as an entrepreneurial start-up that wants to scale as soon as possible, but as a small business that is deliberately committed to staying that way. By staying small, one can have freedom to pursue more meaningful pleasures in life, and avoid the headaches that result from dealing with employees, long meetings, or worrying about expansion. Company of One introduces this unique business strategy and explains how to make it work for you, including how to generate cash flow on an ongoing basis. Paul Jarvis left the corporate world when he realized that working in a high-pressure, high profile world was not his idea of success. Instead, he now works for himself out of his home on a small, lush island off of Vancouver, and lives a much more rewarding and productive life. He no longer has to contend with an environment that constantly demands more productivity, more output, and more growth. In Company of One, Jarvis explains how you can find the right pathway to do the same, including planning how to set up your shop, determining your desired revenues, dealing with unexpected crises, keeping your key clients happy, and of course, doing all of this on your own.

The internet has opened so many possibilities to people regardless of age, location, or background to build a sustainable, online business or side project that can make extra money online every single month. And the best part is that all that is just an Internet connection away. So, here we are with our Awesome course - Income from Home Secrets!! Whatever your reason, there are a ton of different ways how to make money online. We aim to provide valuable information about how to make money from home, tools of the trade and how to find the right niche that will provide you with the means to earn a living online without having to live online. An Overview of how to start making money online in today's times. -Some of the latest ways to earn money online without much investment. -How to find the right niche for online work so that you can be successful in it. -Find out the current Bestselling niches to make money online. -Find out how to make money with blogging. -Find out how to make money selling online courses -Find out how to make money with an ecommerce website. -Find out how to make money as a Freelancer on freelancing websites. -Find out how to earn money with an affiliate marketing. -Find out how to be a virtual assistant and start making income -Find out how to make money with a podcast So, consider getting our comprehensive and up-to-date guide jam loaded with smart and best-in-the-industry tips and tricks to make generous income with real online income jobs from the comfort of your home. Income from Home Secrets Check out below what all you get in our massive info-packed "Income from Home Secrets" Premier Training guide! Because Our objective is to enable every entrepreneur and small business owner to arm them with the expert knowledge

Be an InventHER is a complete guide to inventing, geared toward any woman who wants to bring her invention, innovation, or creation from idea to the marketplace. Authors Mina Yoo and Hilary Meyerson offer practical advice to any woman looking to take an invention from idea to market. Walking you through the entire process, they offer encouragement, success stories of other female inventors, and concrete guidance to help readers realize their dreams of invention. Inventing and innovation is a hot topic, and this book--coauthored by a woman who created a successful business that started as a sketch on a cocktail napkin--offers a helping hand through the invention process without intimidation or undue complication.

There's a Secret World of Investing Controlled by Angel Investors and Venture Capital One investment has been the secret of the wealthy for more than 80 years. It accounts for nearly a fifth of the wealth for million-dollar investors and nearly four-times the return compared to stocks. For more than eight decades, anyone with less than a million dollars was locked out of this investment. Government regulators reasoned that investors like you and me weren't smart enough to handle the high risk and higher return. That all changed in 2016, when for the first time in a century investment in startup companies became open to everyone. Investing in startups has led to an average 27% return for wealthy investors, nearly four times the average 7.4% annual return on stocks over the decade to 2013. When asked where they invested their money, investors with an average of \$7.6 million told BNP Wealth Management those alternative investments like venture capital and startups were their second-largest investment after their own business. But the government is right in that the risks are high for startup investors. A study by Willamette University of 1,200 investments by angel investors found that more than half of startups fail to return even the original investment. Just a fraction of those investments accounted for the vast majority of gains. But those gains in startup investing can be spectacular. Consider Peter Thiel's 2004 investment of \$500,000 in Facebook as its first outside investor. Most of us weren't able to invest in the social media giant until it went public in 2012. By then, Thiel had already made \$1.7 billion for a 340,000% return on his investment. Welcome to the World of Startup Investing and Equity Crowdfunding! I've spent nearly a decade analyzing startup investments for venture capital firms and angel investors. I set up the research department for one venture capital investor and managed a team of six analysts, pouring over pitch material and market research to find the best startups in which to invest. When equity crowdfunding became popular in 2012, I knew it held the potential to break the 80-year ban on startup investing for everyday investors. I refined my proven methodology for venture capital investing and waited for the law to be changed. Investing in startups is like nothing you've ever seen in the stock market. These companies aren't covered by analysts, and you won't find a P/E value on Yahoo Finance. You won't hear other venture capital investors or angel investors sharing their process or picks on TV either. They don't want you stealing those 27% annual returns. That's what this book is all about, using a process I have developed over years as a venture capital analyst to avoid the risks in startup investing and find the best deals. It's not an easy process. It involves research and strategic planning on your part. I'm ready to share it with you if you're ready for the challenge. In this book you'll learn: My quick checklist of what to look for in a startup to weed out the losers before wasting your time on valuation (Page 53) The process I use to value startup companies for venture capital firms, including how to research the market and understanding deal terms (Page 63) Three different valuation methods I use with every deal that gives me more certainty in the upside (Page 83) A startup investing strategy that puts your money in the best deals and avoids chasing the losers. (Page 107) Tired of being stuck with roller-coaster risk in the stock market and mediocre returns? If you want in on the investments that make angel investors and venture capital firms billions of dollars, scroll back up and click buy now.

A groundbreaking book on the growing trend of crowdfunding Crowdfunding has gained considerable traction over the last few years. By combining the Internet/social media with equity-based financing, it is poised to usher in a new asset class that will change how early stage and small business financing transactions are consummated. Author Steven Dresner, Founder and CEO of Dealflow.com, understands the nuances of how crowdfunding can help companies gain much needed access to capital, and now he shares those insights with you. Engaging and informative, this book will serve the needs of a global audience comprising entrepreneurs, financiers, and other professionals. It skillfully addresses the market dynamics that are catapulting crowdfunding into the mainstream and explores essential issues ranging from

planning an online campaign, post-transaction management, and business planning to securities law and tax issues. Puts the business of crowdfunding in perspective with a look at the current marketplace, overview of important data, and legitimate concerns Examines effective techniques for communicating with the crowd Details equity-based financing and other sources such as debt instruments Contains contributions from a wide array of individuals involved in the worlds of finance, law and accounting, social media, marketing, as well as DealFlow Media's own staff Crowdfunding affords-start ups and other smaller businesses better access to capital via the Internet/social media. It also allows an investor of any size to back a business of their choosing. This new book will show you what this process entails and how it can benefit everyone involved.

Finding an angel investor to fund the next big idea has always been a daunting task. The next difficult task is to gain marketing exposure. Together, these elements can make or break a startup. Until recently, these two were separate activities – you first find investors & raise money, and then you would allocate your marketing spend. The advent of crowdfunding has disrupted the way funding and marketing is done – by combining these critical tasks and getting them done at the same time. Crowdfunding – Venture Capital on Steroids. With crowdfunding, you can set your terms, retain your company's vision & culture, and bring several shareholders rather than just a handful – and most importantly get promotional boost that comes with this. Furthermore, crowdfunding also allows you to offer shares and attract a lot more money! Entrepreneurs usually raise hundreds of thousands, and even millions! This Book Is Your Blueprint on the "HOW"! Crowdfunding has offer new avenues for startups and it is relatively easier to start a business than ever before. But it is also attached with a steep learning curve. Many ventures find themselves into deep waters without the real knowledge of choosing a platform, crafting a pitch and attracting investors.

Learn the ins and outs of equity crowdfunding with this informative guide Equity Crowdfunding for Investors is a comprehensive, objective, and authoritative guide to the social and financial rewards of crowdfunding. Before now, angel investing – and the spectacular returns possible in this asset class – has been off-limits to all but the wealthiest Americans. Now equity crowdfunding portals allow the general public to buy shares in startups and fast-growing private companies for the first time in generations. This book provides the guidance individuals need to invest wisely, tempering the excitement of leading-edge technology, innovative business models, and exciting new brands with thorough, practical know-how – including investor limits and requirements, portfolio strategy, deal terms, and much more. Readers will learn the pros and cons of investing in equity crowdfunding so they can make an informed investment decision, as well as best practices for finding, researching, evaluating, and buying into potentially profitable startups. Digital components include tables, graphs, comparison charts, screen captures, checklists, and other tools that further enable readers to make suitable investment choices. Equity crowdfunding is a new, exciting, and evolving way for growing businesses to raise capital and for average investors to buy equity in those businesses. It has been hailed as a "game changer" in the private capital markets, particularly the angel investment asset class, which includes angel investing. This book shows readers how to take full advantage of this new avenue of investment, without being taken advantage of themselves. Make smarter investment decisions Avoid being ripped off Find the best information available Understand the SEC rules and limits Equity crowdfunding can produce huge returns. It also comes with huge risk. Some companies will succeed, but many will fail. Everyday investors can mitigate some risk and increase their chance of profit with the fundamental insight provided in Equity Crowdfunding for Investors.

"An examination of the efficacy of investor protection regulations"--

The Routledge Companion to Arts Management contains perspectives from international scholars, educators, consultants, and practitioners sharing opinions, exploring important questions, and raising concerns about the field. The book will stimulate conversations, foster curiosity, and open pathways to different cultural, philosophical, ideological,

political, national, and generational insights. Four broad thematic areas are used to organize current topics in the field of arts and culture management. Part I introduces a mixture of perspectives about the history and evolution of the practice and study of arts management, the role of arts managers, and how arts management is being impacted by the digital age. Part II focuses on the dynamics of entrepreneurship, change processes, and leadership practices. Part III includes globally focused topics on cultural policy, cultural rights, and community building. Part IV examines a sampling of topics related to functional activities that are common to arts and culture organizations around the world such as marketing, planning, increasing diversity, hiring, fundraising, and sustainability. This book builds a comprehensive understanding of what arts management can mean in an international context creating an essential resource for students, scholars and reflective practitioners involved at the intersection of business and the arts.
