normal function, assess risk or dysfunction, envision potential outcomes, plan and provide for interventions and evaluate the effectiveness of a treatment, students will be equipped to stay on track while customizing care for each patient. Chapters open with a case study and include critical thinking questions, Apply Your Knowledge Boxes, and Ethical-Legal Boxes to build students' decision-making abilities and clinical judgment. Collaborating with the Healthcare Team Boxes and Patient Teaching Boxes demonstrate the importance of communication in these clinical scenarios. While all books list critical thinking exercises as a feature, most books like Potter and Kozier include these questions at the end of the chapter.
