This book has basic contact information for schools and colleges within the trades and technical skills. I've looked around. A book like this doesn't exist anywhere right now, a book that tries to list most of the community colleges and trades-vocational schools in the United States. I deal with specific profession schools in the next book. A lot of colleges offer career programs that don't lead to a degree but rather a certificate for the vocational field. Local community colleges often offer many programs in the practical skill occupations. Professional and trade organizations present free or low-cost webinars in addition to their traditional courses available for a fee.

DESCRIPTION This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more. Nine modules in all provides coverage of: Basic Safety, Introduction to Construction Math, Introduction to Hand Tools, Introduction to Power Tools, Construction Drawings, Basic Rigging, Basic Communication Skills, Basic Employability Skills, and Introduction to Materials Handling. **Key Features** New 5-hour module, Introduction to Materials Handling (00109-09), covers instruction on safe methods of stacking, storing, and moving construction-related materials. All modules except Basic Rigging (00106-09) are now required for a course completion certificate. The Basic Safety module (00101-09) aligns to the OSHA 10-hour guidelines. Any OSHA 500-certified instructor can issue OSHA 10-hour cards to students successfully completing this module. Includes Going Green features throughout, and emphasizes energy efficient products and low environmental-impact methods of construction. Introduction to Construction Math
