

## Drinking Age Argument Paper

Whether adults realize it or not, the world we portray shows children and teens that alcohol is an important part of enjoying life. It is only natural during the years a teen is exerting rights and seeking independence, that they'd want to try what we inundate them with in messaging as a good time. This fact of life is what leads us to the controversial, contentious, and never-ending debate on teen rights and alcohol. This collection of essays analyzes many issues related to alcohol, including the national minimum drinking age, the liability of adult hosts of social gatherings where minors are served alcohol, the prospect of a graduated alcohol licensing system that would loosen restrictions for people aged 18 to 20, and the growing trend of mandatory alcohol testing at high school dances.

This book offers a much needed alternative to the more traditional texts used to teach writing instruction. Grounded in history, the book clarifies changing theoretical and practical approaches to teaching writing, critically assessing each approach in relation to the social and political movements of the day, both within and beyond the university. The author takes us inside the real world of writing instruction; not only from the viewpoint of instructor, but as seen through the eyes of students struggling to make sense of the expectations of writing class. Mitchell emphasizes that "writing" entails far more than putting words to paper, and delves into contextually variable culturally defined expectations, that include multiple linguistic forms - both oral and written - highlighting the complexity of writing(s), while engaging the reader in lively academic debates about language and society.

Praised for its practical strategies, real-world emphasis, and focus on critical thinking, this successful 4-in-1 text (rhetoric, reading, research guide, and handbook) prepares students for writing in college and in the workplace. THE SUNDANCE WRITER, FIFTH EDITION, provides students with essential skills needed for writing in college and beyond, including critical thinking and reading, as well as writing for academic and workplace audiences. The fifth edition features an important restructuring of content that allows students to proceed more quickly to writing projects and to incorporating research into their writing. The Craft of Argument is designed to help integrate the skills of writing, critical thinking, and arguing for the purpose of enabling the writer to write arguments that are clear, sound, and persuasive. Integrating the skills of writing, critical thinking, and arguing in order to write arguments that are clear, sound, and persuasive is the key benefit of The Craft of Argument. Part 1 presents an overview of the nature of argument. Part 2 offers a detailed discussion of the five elements of argument (finding and stating a claim; reasons and evidence; reporting evidence; acknowledgments and responses; and warranting claims and reasons). Part 3 focuses on meaning and causation. Part 4 emphasizes language-how to write clearly and vividly, and how to use language persuasively. Part 5, Readings, comprises a wide range of sample arguments for analysis and springboards for discussion and further writing. General Interest: Improving Writing

Sit Down Comedy is a personal and informal "text" written to help students and instructors with the basics of rhetorical and written discourse. It is my desire that the book be entertaining, accessible, and educational.

Writing Across Cultures invites both new and experienced teachers to examine the ways in which their training has—or has not—prepared them for dealing with issues of race, power, and authority in their writing classrooms. The text is packed with more than twenty activities that enable students to examine issues such as white privilege, common dialects, and the normalization of racism in a society where democracy

is increasingly under attack. This book provides an innovative framework that helps teachers create safe spaces for students to write and critically engage in hard discussions. Robert Eddy and Amanda Espinosa-Aguilar offer a new framework for teaching that acknowledges the changing demographics of US college classrooms as the field of writing studies moves toward real equity and expanding diversity. *Writing Across Cultures* utilizes a streamlined cross-racial and interculturally tested method of introducing students to academic writing via sequenced assignments that are not confined by traditional and static approaches. They focus on helping students become engaged members of a new culture—namely, the rapidly changing collegiate discourse community. The book is based on a multi-racial rhetoric that assumes that writing is inherently a social activity. Students benefit most from seeing composing as an act of engaged communication, and this text uses student samples, not professionally authored ones, to demonstrate this framework in action. *Writing Across Cultures* will be a significant contribution to the field, aiding teachers, students, and administrators in navigating the real challenges and wonderful opportunities of multi-racial learning spaces.

Through a variety of exercises and extensive readings, the text teaches students to read carefully and summarize accurately, to recognize and respond to specific points in the material they have read, to synthesize ideas from several reading selections, and to evaluate

and argue about the ideas they have found in their reading material. Although the authors' focus is on writing about reading, they also encourage students to use their personal experiences to develop and support their ideas. This combination results in a text that not only imparts the fundamentals of college-level writing, but also helps each student find his or her own voice—and discover that they do, indeed, have something to say. Widely praised, ARGUMENTATION AND DEBATE, 13E, uses a clear, concise, and engaging presentation that makes even complex material easy for students to understand. The authors have adapted the text over the years to match changing practices in debate and teaching while preserving classical and conventional approaches to learning debate. This edition retains its rhetorical roots with a flexible tone open to a diverse array of debate styles that is appropriate in the contemporary context. It values the importance of inclusion and sensitivity to differences of culture, gender, orientation, class and other factors as they impact communicative choices and argumentation. The authors have a preference for team topic evidence-based policy debate; however, the text strives to offer viable tools for a wide range of readers interested in improving their critical thinking for reasoned decision making. Donnalee Rubin examines the responses of thirty-one freshman composition teachers to student writing and shows the negative

effects of gender bias on assessment to prove that gender perceptions and expectations can influence assessment decisions that seem neutral on the surface. Arguing that certain pedagogies are more likely to minimize gender bias than others, Rubin believes that teachers are more likely to overcome the influence of gender bias on their teaching if they adopt a process-based method and work intimately with their students through nondirective, supportive conferences. Rubin characterizes the conference/process-centered class as the type of environment in which maternal teaching can be cultivated. She stresses that maternal can describe any teacher, male or female, who exhibits the nurturing and supportive qualities that the conference/process approach embodies. With a primary focus on the student's well-being and development as a person and a writer, the maternal teacher is in a better position to overcome gender bias that could distort the interpretation of student texts. In order for writing instructors to increase their sensitivity to gender issues in assessment, Rubin recommends that they self-consciously engage in what she calls "responsive reading." Responsive reading occurs when the teacher reads with an eye toward providing the sorts of supportive feedback and dialectic exchange that will encourage student writers to think for themselves and to revise effectively. Rubin argues that when teachers commit to a responsive-reading pedagogy, they are more likely to question their reactions to student writing along the lines of gender influence and to strive for self-conscious awareness of how their own inner male-female voices may distort their reading of student texts. She challenges all writing teachers to become more aware of the inevitable challenge gender influence presents.

Teaching Queer looks closely at student writing, transcripts of class discussions, and teaching practices in first-year writing courses to articulate queer theories of literacy and writing instruction, while also considering the embodied actuality of being a queer teacher. Rather

than positioning queerness as connected only to queer texts or queer teachers/students (as much work on queer pedagogy has done since the 1990s), this book offers writing and teaching as already queer practices, and contends that the overlap between queer theory and composition presents new possibilities for teaching writing. Teaching Queer argues for and enacts “queer forms”—non-normative and category-resistant forms of writing—those that move between the critical and the creative, the theoretical and the practical, and the queer and the often invisible normative functions of classrooms.

This paper presents the results of a review of hundreds of hours of testimony before State legislatures, large amounts of editorial opinion and voluminous research reports in an effort to distill the most commonly heard arguments against the 21 year old drinking age. Many of these arguments are myths or misperceptions of fact. Some are outright fictions. Some are sincere concerns for rights and liberties that are no less valid simply because they compete with other, equally valid rights. All are views strongly held by many people, the vast majority of whom are honestly motivated by and interested in the freedom and well being of young Americans. Those who see the drinking age 21 as an essential step toward preserving that freedom and well being need to treat their opponents and their arguments with respect. Legitimate concerns and sincere questions deserve respectful, logical responses.

Explores how we justify our beliefs - and try to influence those of others - both soundly and effectively.

Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks - and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? Reducing Underage Drinking addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. Reducing Underage Drinking will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.
