combination of two distinct yet complementary pedagogical techniques. First, chapters designed for experiential, hands-on studies put the student in the roles of researcher, participant, and consumer to bring concepts to life. Second, the findings of cognitive science guide the text in a way that is most conducive to learning. This novel approach serves as an effective way to make the world of psychological research fun and rewarding for students, in addition to allowing them to gain the foundational knowledge they need to design, conduct, and present research.
