not more so, than understanding the “how,” especially in an introductory course. Three basic themes emerge as their central focus: 1. An emphasis on intuition—separate and explain the principles at work on a common sense, intuitive level before launching into specifics. Underlying ideas are discussed first in general terms, then followed by specific examples that illustrate in more concrete terms how a financial manager might proceed in a given situation. 2. A unified valuation approach—Net Present Value is treated as the basic concept underlying corporate finance. Every subject the authors cover is firmly rooted in valuation, and care is taken to explain how decisions have valuation effects. 3. A managerial focus—Students learn that financial management concerns management. The role of financial manager as decision maker is emphasised and they stress the need for managerial input and judgment.
