Philosophy of Nursing provides an introduction to a new and emergent area of study within nursing. The nature of the philosophy of nursing is explored and applied to three areas of enquiry central to nursing theory and practice: knowledge, persons and care. The idea of knowledge seems crucial because it appears to be important to base nursing interventions on what is known, rather than that which is merely believed. But what is the difference between these? Also, it is common, currently to distinguish between practical knowledge and theoretical knowledge but what is the relationship between the two? The conception of a person is unquestionably of fundamental relevance to nursing but are patients simply biological organisms? Should their treatment and care plans reflect this? appeals to the idea of a patient as a 'narrative'? What role does caring have and what is 'ontological caring'? This stimulating text seeks to provide answers to all of these questions and to explain their relevance to nursing. Throughout key debates the author critically engages with the work of major nursing writers, and in particular with Benner and Wrubel, and Carper. In conclusion the discussion focuses on the nature of nursing, how this is best understood and why it is important. For the first time illuminating answers are supplied to the issues in nursing theory and practice upon which the very nature of such theory and practice depends. Nurses today must be able to grow and evolve in order to meet the demands of a changing health care system. Fundamentals of Nursing helps them on this journey with comprehensive coverage of contemporary professional nursing. This book has been designed to support student nurses at undergraduate level, particularly those on the Common Foundation Programme and is the only text in the market that equally addresses nursing theory and practice. "Kozier is an excellent resource for students throughout their training, and could be used as the starting point for most of their assessments. Overall, it is an excellent text that I will have no hesitation in recommending to my students." - Dorothy Adam, Lecturer, Nursing & Midwifery, The Robert Gordon University "The text is an exciting, clear and essential textbook for pre-registration nursing students. It sets the scene, shows application to practice, helps to make nursing practice more understandable and so enhances the student's learning experience." - Martin Bailey, Senior Lecturer, Nursing and Applied Clinical Studies, Christ Church University Canterbury
