Little is known about the artist Ohara Koson (1877-1945), whose career bridged the era between the decline of the full-color woodblock print (nishiki-e) in the late 19th century/early 20th century and the emergence of the Shin-hanga ("new print") movement in the 1910s. An artist principally marketed abroad, Koson's bird-and-flower prints met with great success in the United States and Europe. He has only recently received attention in his native Japan following the discovery of important reference material including original sketches and paintings for his prints. "Crows, Cranes and Camellias: the natural world of Ohara Koson 1877-1945" is the first publication in a Western language to discuss his corpus of work, and it has drawn upon the private Jan Perrie Collection for inspiration. Including an overview of Koson's life and artistic career, augmented by a checklist of the majority of his work, select seals and signatures, this book is an invaluable source for Koson collectors. "Crows, Cranes & Camellias" accompanied an exhibition of Koson's work held at the Rijksmuseum Amsterdam in 2001.

Zo ontvouwt zich voor de lezer een tragische liefdesgeschiedenis. In de beschrijving daarvan geeft de auteur blijk van grotere durf, inventiviteit en poëtische zeggingskracht dan ooit tevoren...

The world's second-wealthiest country, Japan once seemed poised to overtake America. But its failure to recover from the economic collapse of the early 1990s was unprecedented, and today it confronts an array of disturbing social trends. Japan has the highest suicide rate and lowest birthrate of all industrialized countries, and a rising incidence of untreated cases of depression. Equally as troubling are the more than one million young men who shut themselves in their rooms, withdrawing from society, and the growing numbers of "parasite singles," the name given to single women who refuse to leave home, marry, or bear children. In Shutting Out the Sun, Michael Zielenziger argues that Japan's rigid, tradition-steeped society, its aversion to change, and its distrust of individuality and the expression of self are stifling economic revival, political reform, and social evolution. Giving a human face to the country's malaise, Zielenziger explains how these constraints have driven intelligent, creative young men to become modern-day hermits. At the same time, young women, better educated than their mothers and earning high salaries, are rejecting the traditional path to marriage and motherhood, preferring to spend their money on luxury goods and travel. Smart, unconventional, and politically controversial, Shutting Out the Sun is a bold explanation of Japan's stagnation and its implications for the rest of the world.
