Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear.

These problems include shortfalls in expected benefits, equipment unreliability, driver skill fade, and error-inducing equipment designs.

Designing Interaction and Interfaces for Automated Vehicles: User-Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive, human-centred design process that focusses on human variability and capability in interaction with interfaces. This book introduces a novel method that combines both systems thinking and inclusive user-centred design. It models driver interaction, provides design specifications, concept designs, and the results of studies in simulators on the test track, and in road going vehicles. This book is for designers of systems interfaces, interactions, UX, Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics. "In this book, Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation. They have developed an approach to designing the human-automation interaction for the handovers between the driver and the vehicle. This approach has been tested in driving simulators and, most interestingly, in real vehicles on British motorways. The approach, called User-Centred Ecological Interface Design, has been validated against driver behaviour and used to support their ongoing work on vehicle automation. I highly recommend this book for anyone interested, or involved, in designing human-automation interaction in vehicles and beyond." Professor Michael A. Regan, University of NSW Sydney, AUSTRALIA

Here is an introduction to the whole cult of the dune buggy, from its earliest beginnings as a crude off-road vehicle in the 1920s, to the explosion of glassfibre-bodied and VW-based fun cars that became the cult transport of teenagers everywhere in the 1960s and 1970s. With histories, production details, dates and identification tips for over 70 US and UK buggies, this book will help identify the many marques that have been produced over the years. Using period photographs and archive material, combined with amazing contemporary photography, the book is a visual feast, and also contains sections on buggies and celebrities for those that want to spot pop stars, TV hosts and racing drivers posing with period vehicles.

A quarter of a century ago, the Land Rover Discovery defined at a stroke how traditional 4 x 4 all-terrain ability could co-exist with family-estate practicality at an affordable price. Since 1989, the Discovery has gone through several iterations, but its essential qualities have remained unchanged. Practical, capable, and above all completely distinctive - the stepped roof seemed odd at first but now defines the Discovery shape - the Discovery has gone on to become one of Land Rover's best-loved products. Land Rover Discovery - 25 Years of the Family 4 x 4 looks in detail at the four generations of Discovery, including full specification details and production histories. Topics covered include the design and development of the original Discovery in the late 1980s, and the move into North America; the new 300Tdi engine and R380 gearbox of 1994, and the BMW takeover; Series II models of 1998-2004, and Land Rover's move from BMW to Ford; Discovery 3/'LR3' - 2004-2009, and the new TDV6 engine, developed by Jaguar; Discovery 4/'LR4' - the all-purpose family luxury car; special editions and

derivatives of all four generations of Discovery, including Discoverys for the emergency services and the Camel Trophy and G4 Challenge competition vehicles. Superbly illustrated with 351 colour photographs.

This book tells the amazing story of the Lamborghini Urraco. It describes the problems that beset this little supercar, and why it never got the chance it truly deserved. After its demise, the Urraco lived on in the form of the Silhouette and the Jalpa, and both these models are also covered in detail in the pages of this book. The unique Bravo and Athon concept cars are also described. Featuring detailed advice for potential buyers, as well as over 300 photos and illustrations, this is a fascinating and practical account of a future supercar classic.

This textbook is the ideal guide for business and management students who need to understand accounting and finance information and develop analytical skills in order to make better-informed decisions. Accounting and Finance for Managers rebukes the myth that in order to excel in accounting and finance you need to be great at mathematics. Split into two broad sections which focus on financial accounting and management accounting and finance, this textbook uses clear, accessible language that will appeal to students from a variety of academic backgrounds. Taking a uniquely practical approach that focuses on the financial aspects of business decisions, the textbook covers all the core topics of accounting and finance, including basic bookkeeping, financial analysis, business planning, cash-flow analysis and investment decisions. Now in its third edition, Accounting and Finance for Managers contains updates on new accounting standards and regulations, as well as featuring up-to-date real-world examples of real options, value chain analysis and competitive advantage analysis. This textbook features 'traditional' accounting practices in detail, but also covers topics with a strategic focus to ensure students learn to think in broader strategic terms. Written for an international audience using International Financial Reporting Standards (IFRS) terminology with supporting online resources including additional exercise questions, curated further reading and lecture slides for each chapter. Nigel Bennett's unique autobiography describes his life and career, from growing-up influenced by car design, to his education and the building of his 750 specials. He describes his work as Firestone Development Manager, recounting many tales of the outstanding designers and drivers of the period. Detailing his work in Formula 1, as a Team Lotus engineer, and then as Team Ensign designer, he also covers his Indycar designs at Theodore, Lola Cars and Penske Cars. Life after his retirement, his involvement in boat design and with modern F1 teams, are also recounted.
