An accompanying electronic site provides book purchasers an opportunity to practice the same questions in an electronic format and gives them access to a 7-day free trial of the PassPoint PN product.

Incorporating all the features of the single-user version into an enhanced product ideal for use by nursing faculty, this institutional version offers instructors the ability to create their own customized exams from the existing set of NCLEX-style multiple-choice questions. Detailed answers, rationales and client needs subcategories are provided for each question. An instructor-set threshold helps to identify at-risk students, and study aids can be generated for students based on areas identified as needing additional review. Pretest, Review, and Test modes are available. New bar graph reports in Test mode reveal class' progress over multiple tests and specific results by topic area. New to this edition are 1,000 more questions, bringing the total number of questions to over 3000. A glossary with approximately 400 medical terms is also included. Schools can load the product onto their network to allow for multiple simultaneous users, or onto personal computers for individual use. Secure password features are included for faculty and student log-ons.
