An interdisciplinary effort of scholars from history, women's studies, and family and consumer sciences, *Remaking Home Economics* covers the field's history of opening career opportunities for women and responding to domestic and social issues. Calls to “bring back home economics” miss the point that it never went away, say Sharon Y. Nickols and Gwen Kay—home economics has been remaking itself, in study and practice, for more than a century. These new essays, relevant for a variety of fields—history, women's studies, STEM, and family and consumer sciences itself—take both current and historical perspectives on defining issues including home economics philosophy, social responsibility, and public outreach; food and clothing; gender and race in career settings; and challenges to the field's identity and continuity. Home economics history offers a rich case study for exploring common ground between the broader culture and this highly gendered profession. This volume describes the resourcefulness of past scholars and professionals who negotiated with cultural and institutional constraints to produce their work, as well as the innovations of contemporary practitioners who continue to change the profession, including its name and identity. The widespread urge to reclaim domestic skills, along with a continual need for fresh ways to address obesity, elder abuse, household debt, and other national problems affirms the field's vitality and relevance. This volume will foster dialogue both inside and outside the academy about the changes that have remade (and are remaking) family and consumer sciences. Contributors: Elizabeth L. Andress, Rima D. During World War II, the UK government created the Central Office of Information to act as the country's marketing and communications agency. In these desperate times, the Office

produced steady streams of propaganda for the home front, for the colonies and for dissemination through occupied countries. In addition to patriotic material encouraging Britons to maintain a stiff upper lip, thousands of postcards, leaflets, posters, booklets and other promotional materials were dropped from aircraft over occupied countries in World War II. In 2000, the master set of copies was deposited with the British Library, making an enormous collection of great social and historical significance available to the public for the first time." The fabric of democracy is threadbare in many contemporary societies. Connections that are vital to the functioning and integrity of our democratic systems are wearing thin. Citizens are increasingly disconnected — from their elected representatives, from one another in the public sphere, and from complex processes of public policy. In such disconnected times, how can we strengthen and renew our democracies? This book develops the idea of democratic mending as a way of advancing a more connective approach to democratic reform. It is informed by three rich empirical cases of connectivity in practice, as well as cutting-edge debates in deliberative democracy. The empirical cases uncover empowering and transformative modes of political engagement that are vital for democratic renewal. The diverse actors in this book are not withdrawing, resisting or seeking autonomy from conventional institutions of representative democracy but actively experimenting with ways to improve and engage with them. Through their everyday practices of democratic mending they undertake crucial systemic repair work and strengthen the integrity of our democratic fabric in ways that are yet to be fully acknowledged by scholars and practitioners of democratic reform.

We all know our earth is in trouble. But is it beyond repair? Are we stuck with a planetary disaster we cannot hope to address? Despite the reality we find ourselves in, Zen practitioner and author Susan Murphy reminds us of the astounding intelligence and magnificence of nature and argues that not only is it not too late, but that we all have the capacity to embrace this challenge with a sense of hope and reason. By shining a sober light on the current state of emergency, Murphy delivers a brilliant rethink of the crisis we face, radically reimagining the stories we tell ourselves about the world, and illuminating the ways humanity might become the solution, rather than the problem. What if we were to choose courage and resolve, rather than fear? What if we discovered the difference each of us could make and started to listen closely to what the earth is saying, and to our own connections with it? In the tradition of the great eco-theologian Thomas Berry, *Minding the Earth, Mending the World* offers a profoundly hopeful second chance to engage with what it means to deeply mind the earth once more.

This accessible book explores this history, outlining innovations in patternmaking by the companies who produced patterns and how these reflected the fashions and demands of the market. Showcasing beautiful illustrations from original pattern pamphlets, packets and ads, as well as 9 complete patterns from which readers can reproduce vintage garments of different eras, the book provides a unique visual guide to homemade fashions as well as essential exploration of the industry that produced them. Presents information on home maintenance and remodeling with more than three hundred step-by-step projects that cover such topics as masonry, plumbing, insulation, flooring, trimwork, siding, roofing, and windows.

Mending Matters explores sewing on two levels: First, it includes more than 20 hands-on projects that showcase current trends in visible mending that are edgy, modern, and bold—but draw on traditional stitching. It does all this through just four very simple mending techniques: exterior patches, interior patches, slow stitches, darning, and weaving. In addition, the book addresses the way mending leads to a more mindful relationship to fashion and to overall well-being. In essays that accompany each how-to chapter, Katrina Rodabaugh explores mending as a metaphor for appreciating our own naturally flawed selves, and she examines the ways in which mending teaches us new skills, self-reliance, and confidence, all gained from making things with our own hands. *Resistance Crafts* Craftivism can be your voice of resistance: Craftivism is a non-threatening form of activism that gives people a voice when they feel voiceless and power where they feel powerless. This thoroughly revised and updated edition of *Fashion Theory: A Reader* brings together and presents a wide range of essays on fashion theory that will engage and inform both the general reader and the specialist student of fashion. From apparently simple and accessible theories concerning what fashion is to seemingly more difficult or challenging theories concerning globalisation and new media, this collection contextualises different theoretical approaches to identify, analyse and explain the remarkable diversity, complexity and beauty of what we understand and experience every day as fashion and clothing. This second edition contains entirely new sections on fashion and sustainability, fashion and globalisation, fashion and digital/social media and fashion and the body/prosthesis. It also contains updated and revised sections on fashion, identity and difference, and on fashion and consumption and fashion as communication. More specifically, the section on identity and difference has been updated to include contemporary theoretical debates surrounding Islam and fashion, and LGBT+ communities and fashion and the section on consumption now includes theories of 'prosumption'. Each section has a specialist and dedicated Editor's Introduction which provides essential conceptual background, theoretical contextualisation and critical summaries of the readings in each section. Bringing together the most influential and ground breaking writers on fashion and exposing the ideas and theories behind what they say, this unique collection of extracts and essays brings to light the presuppositions involved in the things we all think and say about fashion. This second edition of *Fashion Theory: A Reader* is a timeless and invaluable resource for both the general reader and undergraduate students across a range of disciplines including sociology, cultural studies and fashion studies.

A deep exploration of the intersection of faith, creativity, and justice from acclaimed hip-hop artist and creative polymath Sho Baraka “Sho has the courage to say what many are thinking and the candor to say what many are not. His words have positively influenced me for years—now this book gives the world that influence.”—Lecrae You were created to help bring truth and beauty into this broken world. God made you with an imagination and a yearning for justice. No matter your calling or vocation, you can help shape a better world around you through your creativity. But that doesn’t mean it will be easy. We are surrounded by toxic stories and bad cultural thinking. We’re held back by incomplete theology. But does it have to be like that? Is frustration the end of the story? In the face of confusion and injustice, we can lose sight of our true narrative—the one that started in a garden and wants to make our real lives better today. In *He Saw That It Was Good*, activist and recording artist Sho Baraka wrestles deeply and honestly with these questions, gives you permission to do the same, and shows a hard-earned path to creative change. With Sho, you’ll engage with art, justice, and history. Learn from the powerful principles of historic movements, explore why it’s important to cultivate your creative calling (no matter what you do!), and discover a fresh look at how the gospel can transform how you see God, your neighbor, your work, and your world. You’ll return to your biggest and truest story. Your life (and your world) need never be the same. *Fashion Design for Living* explores the positive contribution that the contemporary fashion designer can make within society. The book seeks to reveal new ways of designing and making fashion garments and products that not only enhance and enrich our lives, but also are mindful of social and sustainable issues. This book sets out to question and challenge the dominant, conventional process of fashion design that as a practice has been under-researched. While the fashion designer in industry is primarily concerned with the creation of the new seasonal collection, designed, produced and measured by economically driven factors, society increasingly expects the designer to make a positive contribution to our social, environmental and cultural life. Consequently an emergent set of designers and research-based practitioners are beginning to explore new ways to think about fashion designing. The contributors within this book argue that fashion designing should move beyond developing garments that are just aesthetically pleasing or inexpensive, but also begin to consider and respond to the wearer’s experiences, wellbeing, problems, desires and situations, and their engagement with and use of a garment. *Fashion Design for Living* champions new approaches to fashion practice by uncovering a rich and diverse set of views and reflective experiences which explore the changing role of the fashion designer and inspire fresh, innovative and creative responses to fashion and the world we live in.
