This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and

outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

With lots of examples and color images, this resource is both a foundational text and a practical guidebook for bringing contemporary art into elementary and middle school classrooms as a way to make learning joyful and meaningful for all learners. It is surprising that there is so little research on textbooks, given their centrality to teaching and learning in elementary and secondary schools. Textbooks have become a focus of political and cultural controversy, advocating a multicultural curriculum that has sparked some vigorous protests. Research is absent in this debate; therefore, questions of legitimate

knowledge, the role of textbooks, textbook design, policy selection issues, and economic issues concerning the marketplace are not part of the current debate. Without insights of research on considerate text, mentioning, illustrations and so forth, the current controversy will result in publishers responding to demands for more content not less; thus, textbooks will become compendia of information that on the surface satisfy everyone. This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools, and thus inform policymakers, publishers, and those involved in textbook selection. Representing pure and applied approaches, researchers present papers on the quality of writing, the role of questions, the role of pictures and illustrations, and the role of auxiliary materials in the design of effective textbooks. The chapters provide insight into research and its application to textbook design and improvement -- stimulating others to follow this lead.

"A guide to building better language arts skills based on Sylvan's ... techniques for success"--Cover.

This book examines the political, ideological, and socio-cultural politics underlying the 2009 National Multicultural Curriculum Reform and recent multicultural education policies in South Korea. Unlike the conservative groups in Western countries who argue that supporting cultural diversity and the cultural rights of minority groups balkanizes ethnic differences and divides the community, the New Rights and the conservative groups in South Korea have been very supportive of multicultural discourses and practices and have created many multicultural policy agendas geared toward ushering in what have they called "the multicultural era." Through the Critical Discourse Analysis (CDA) of government multicultural policy documents, a range of media sources, the 2009 national curriculum reform policy documents, and the 200 Korean language arts textbooks from 23 textbook publishers, *Multicultural Education in South Korea: Language, ideology, and culture in Korean language arts education* examines how the conservative Korean government's interpretation and practices of multiculturalism have been infiltrated and challenged by progressive and migrant-led agents/agencies. The analysis of academic, official, and popular discourses on migrant Others is focused on, but not limited to: "The multicultural era" and struggles for hegemonic power; Politics of multicultural knowledge control in education and society; Formation of discourses on multicultural society and multicultural education; Examining the national curriculum: The politics of representing migrant Others; and The hidden curriculum of multicultural education: Limitations and possibilities. The author's insightful discussion on the politics of knowledge, education, and teaching in multicultural societies will prove particularly useful to policy makers, think-tank officials, and academic scholars in education.

This text is designed specifically to meet the needs of preservice teachers who have had little experience working in middle-grade classrooms. Three ideas are central: \* teaching language arts at the middle level is a complex activity that demands expertise in the use of a variety of strategies, \* reading and writing are key processes of language arts study, but so are speaking, listening, and viewing/visually representing, and \* teaching the processes of effective communication is crucial, but middle school students must also begin to learn the content of the field--literature, language, and media. Teaching Language Arts in Middle Schools gives balanced attention to various teaching strategies, processes, and content, demonstrating how all of these connect to improve students' abilities to communicate. In this text:

\*Research and theory are summarized and applied to practice \*A non-prescriptive approach is integrated with practical information \*Debates in the field are acknowledged \*Additional reading and research are emphasized \*The author's voice and point of view are explicit

"My whole goal with this book was to come at teaching writing from the angle that matters most: students' perspective. They taught me what I needed to know to make this book live up to their passion for writing." -Laura Robb "Laura Robb's book has the feeling of a classified document smuggled out of the teen nation about their writing lives in and outside of school. And this top-secret information, this remarkable intelligence she has gathered comes not a minute too soon. Her findings are fascinating-and important, for she translates these findings into practice for us, showing us how adolescents' need for choice and responsibility can fit within lessons on using mentor texts, style, grammar, revision, editing, and familiar classroom structures." -Jim Burke, Author of What's the Big Idea? Adolescents have robust and rewarding writing lives outside of school that involve journals, emails, text messages, blogs, and an astounding array of genres. Unlike their personal reading lives that teachers frequently tap into, their personal writings typically exist under the curricular radar-that is until now. While grounded in the common schedule constraints and curriculum demands of middle school, Laura Robb's Teaching Middle School Writers offers teachers lessons and routines that are uncommonly attuned to adolescents' developmental and social needs. As she taps into the energy and enthusiasm of adolescents' personal writing lives, Laura presents: - writing plans that support first drafts - strategies for crafting leads that grab and endings that satisfy - grammar lessons that address writing conventions - editing lessons that have students revise their writing before the teacher reads it - guidelines for grading and responding to student work. Straight-from-the-classroom writing samples and videos give teachers the opportunity to see how Laura uses compelling questions and powerful mentor texts to teach writing, support struggling writers, and weave twenty-first century literacies into the writing curriculum. Throughout, teachers learn ways of connecting to students' lives in order to bring out their best writing, their best self.
