Handboek voor de uitvoering van ICT-projecten volgens een internationale, gezaghebbende standaard.

A groundbreaking investigation of the brain's hidden logic behind our strangest behaviors, and of how conscious and unconscious systems interact in order to create our experience and preserve our sense of self. From bizarre dreams and hallucinations to schizophrenia and multiple personalities, the human brain is responsible for a diverse spectrum of strange thoughts and behaviors. When observed from the outside, these phenomena are often written off as being just "crazy," but what if they were actually planned and logical? NeuroLogic explores the brain's internal system of reasoning, from its unconscious depths to conscious decision making, and illuminates how it explains our most outlandish as well as our most stereotyped behaviors. From sleepwalking murderers, contagious yawning, and the brains of sports fans to false memories, subliminal messages, and the secret of ticklishness, Dr. Eliezer Sternberg shows that there are patterns to the way the brain interprets the world—patterns that fit the brain's unique logic. Unraveling these patterns and the various ways they can be disturbed will not only alter our view of mental illness and supernatural experience, but will also shed light on the hidden parts of ourselves. (With black-and-white illustrations throughout.)

ON COURSE: STRATEGIES FOR CREATING SUCCESS IN COLLEGE AND IN LIFE, STUDY SKILLS PLUS EDITION was created for educators who would like to promote student growth and self-awareness, and whose goal it is to empower their students while providing more extensive instruction in study skills. The Study Skills Plus Edition engages students in a learner-centered construction of study skills knowledge, and gives students practice in applying empowerment strategies. The ON COURSE STUDY SKILLS PLUS EDITION demonstrates the choices that successful students make. This new text highlights the very process of learning how to solve academic challenges with improved study skills so that students learn the empowering process of critical and creative problem solving that will enable them to achieve greater success in all parts of their lives. This is accomplished through case studies, where students can apply strategies they learn to scenarios before creating their own academic skills plan. A self-assessment tool at the beginning of the text helps students to identify behaviors and beliefs they may wish to change in order to achieve more of their potential in college and in life. Students have an opportunity to revisit their self-assessment at the conclusion of the text. Written in a positive, motivational style, ON COURSE empowers students with the tools they need to take charge of their

success in college and in life. Downing's powerful guided journal entries are retained from the ON COURSE text to help students develop essential life skills by encouraging exploration of personal responsibility, self-motivation, interdependence, and self-esteem.

Straightforward, practical, and user friendly, this unique guide addresses an essential component of decision making in schools. The authors show how systematic screenings of behavior—used in conjunction with academic data—can enhance teachers' ability to teach and support all students within a response-to-intervention framework. Chapters review reliable, valid screening measures for all grade levels, discuss their strengths and weaknesses, and explain how to administer, score, and interpret them. Practitioners get helpful guidance for evaluating their school's needs and resources and making sound choices about which tools to adopt.

Stichting Vrienden Tandheelkundig Erfgoed De Nederlandse Maatschappij tot bevordering der Tandheelkunde (NMT) heeft in 1960 de prenten uit de collectie De Maar aangekocht. De Haagse tandheelkundige Klein (1885-1947) had een grote historische tandheelkundige verzameling, uiteenlopend van prenten en instrumenten tot een collectie kostbare boeken. Deze collectie werd in 1960 door F.E.R. de Maar, oprichter en conservator van de tandheelkundige collectie van het Universiteitsmuseum Utrecht, verworven. De collecties Klein en De Maar vormen nu de grootste verzameling op het gebied van tandheelkundige prenten ter wereld. Uit de ruim 600 prenten van de NMT zijn voor dit boek de 275 mooiste geselecteerd. Ze zijn verdeeld over 100 taferelen. Kaakchirurg Gert Schade heeft ze opgenomen in vier hoofdstukken, waarin martelares en patroonheilige Apollonia haar entree doet, kwakzalvers hun middelen en behandelingen aanprijzen op kermissen en jaarmarkten, het tandheelkundig metier zijn werkzaamheden verplaatst van markt naar salon en het ontstaan van de spotprent aan de orde komt, uitmondend in de politieke satire. Dit boek verschijnt ter gelegenheid van het honderdjarig bestaan van de NMT en schetst op een levendige en soms geestige wijze een schitterend beeld van de boeiende geschiedenis van de tandheelkunde uit de periode 1470-1870.
