For the first time, the inside story of the brilliant American engineer who defeated Enigma and the Nazi code-masters Much has been written about the success of the British “Ultra” program in cracking the Germans’ Enigma code early in World War II, but few know what really happened in 1942, when the Germans added a fourth rotor to the machine that created the already challenging naval code and plunged Allied intelligence into darkness. Enter one Joe Desch, an unassuming but brilliant engineer at the National Cash Register Company in Dayton, Ohio, who was given the task of creating a machine to break the new Enigma settings. It was an enterprise that rivaled the Manhattan Project for secrecy and complexity—and nearly drove Desch to a breakdown. Under enormous pressure, he succeeded in creating a 5,000-pound electromechanical monster known as the Desch Bombe, which helped turn the tide in the Battle of the Atlantic—but not before a disgruntled co-worker attempted to leak information about the machine to the Nazis. After toiling anonymously—it even took his daughter years to learn of his accomplishments—Desch was awarded the National

Medal of Merit, the country's highest civilian honor. In *The Secret in Building 26*, the entire thrilling story of the final triumph over Enigma is finally told. From the Trade Paperback edition.

Handbook of Urban Landscape deals with aspects most related to architecture while, at the same time, it aims to serve the landscape profession itself. Because the field of landscape work is so wide, the present handbook is limited to urban landscape. The handbook can be used at three levels. Its technical studies and reviews form a general guide to current thought on the design of various kinds of open space; its design guide and information sheets are a daily reference for the landscape design process; and through its sources and references, readers can obtain background information or more specific guidance on particular aspects.

This handbook is intended as a desk-side guide for all designers of urban space, including architects, landscape architects, planners, and engineers—and for students of these professions. It should also help to improve understanding of the work and procedures of landscape architects, so that all who use them as consultants will be better equipped to brief them.

This history of sport in Ireland, locates it within Irish political, social, and cultural history, and within the global history of sport. This book offers a unique insight into the British Empire in Ireland; it also assesses the relationship between sport and national identity, and the manner in which states make policy in respect of sport. The manner in which sport has been colonised by the media and has colonised it, in turn, is also examined.
